

Care Community - Extra Care Plus Developments

We are passionate about delivering the right care for individuals and their families and about ensuring continuity of care so that care can change as needs change. This is why we work as a care community.

This drive to deliver flexible, person-centred care has guided our developments to date and continues to do so. This is why we are now developing **Pendine Park Extra Care Plus Accommodation**.

This purpose-built accommodation will allow families to live together while accessing flexible care and support from the Pendine Park Care Community. It will help couples with different needs to live together in their own home.

This affordable, environmentally sustainable accommodation will help us create supportive communities where people live and work together and are treated as individuals.

There are a number of elements to our care community, which work together to deliver flexible care.

- **Pendine Park Care Homes** provide small, family-feel residential care and flexible day care, respite, convalescence and rehabilitation support.
- **Pendine Park Independent Living** provides care at home and help to retain independence in the community.
- **Pendine Park Teaching Care Centre** provides free training to family carers.

This means we can continue to offer great care if needs change. It ensures the right care, at the right time, in the right place.
